

NEW PRODUCT ANNOUNCEMENT

Snow Meister SL-1 Enhancement

SHOWN PAINTED
TO COORDINATE
WITH ROOF

MILL FINISH

DESCRIPTION:

Berger Building Products is proud to introduce its latest in an extensive line of Snow retention products; SL-1 Snow Guard. This popular snow retention product has been redesigned to fit 1" Snap Lock Panel. The throat width has been increased to 41/64" (0.64") and a leg lip has been added to allow the guard to "snap" over the seam for a smooth and quick installation.

FEATURES & BENEFITS:

- Fits most 1" Snap Lock Panel
- Fits most 1" Single Lock Panels
- No roof penetrations – stainless steel set screws dimple the metal
- Can be painted to match your roof
- Greatly reduces damage from snow slides and ice dams

AVAILABLE OPTIONS:

The SL-1 is made from lightweight, durable die cast aluminum. It is available in Mill Finish, Black Primer and Custom Color - painted to match your roof!

TECHNICAL INFORMATION:

- Snow guards are small devices that are attached to roofs to reduce ice dams and stop large amounts of snow and ice from sliding off a roof and damaging property or injuring pedestrians.
- Snow guards should be installed above entrances, sidewalks and anyplace where people gather.
- Snow guards help save money by reducing costly insurance claims.
- Snow guards should be applied in sufficient quantity according to a prescribed pattern in order to be effective. Placement will vary from region to region and will be influenced by roof pitch, the lengths of roof runs and roof features.
